

Password Reset Guide

Resetting Your Password

If you've forgotten your password or want to change it for security reasons, follow the steps below. The reset link is valid for 30 minutes from the time it is sent.

- 1 Go to the login page and click "Forgot Password?" below the password field.
- 2 Enter the email address associated with your account and click "Send Reset Link."
- 3 Check your inbox for an email from noreply@example.com. It typically arrives within 2-3 minutes.
- 4 Click the reset link in the email. This will open a page where you can set a new password.
- 5 Choose a new password that is at least 10 characters long and includes at least one number and one symbol.
- 6 Click "Update Password." You will be automatically logged in and redirected to your dashboard.

Reset Link Expired or Not Working

Reset links expire after 30 minutes for security reasons. If your link has expired, simply repeat the "Forgot Password" process to generate a new one. Only the most recently generated link will be valid - older links are invalidated automatically.

Didn't Receive the Reset Email?

Check your spam or junk folder first. If it's not there, confirm you entered the correct email address associated with your account. You can request a new reset email once every 5 minutes. If you still don't receive it after three attempts, your account may be using a different email than expected, or your email provider may be blocking automated mail - in this case, please contact support so a human agent can verify the account on file.

Password Requirements

- Minimum 10 characters
- At least one number (0-9)
- At least one special character (!@#\$%^&*)
- Cannot match any of your last 5 previous passwords

Changing Your Password While Logged In

If you're already logged in and simply want to change your password, go to Account Settings > Security > Change Password. You will need to enter your current password once before setting a new one. Changing your password will log you out of all other active sessions and devices automatically.
